

Environmental Policy

It is the intention of Penso to carry out its activities with minimum impact upon the environment and to ensure that measures are in place to prevent the risk of pollution to both the company and the surrounding environment. The activities of Penso shall be assessed regularly with the intention of continuously improving our environmental performance.

Our business shall adopt and aim to apply the principles of 'Sustainable Development' – which is development that meets the company's needs at present, without compromising the activities of future generations to meet their own needs.

We shall comply with all with all existing environmental legislation associated with our manufacturing operations as a minimum to achieving our environmental goals. It is our intention to obtain certification to BS EN ISO 14001:2002. We shall undertake regular environmental reviews and develop suitable objectives and targets.

Penso shall purchase the minimum amount of raw materials necessary to produce its products, re-use packaging wherever possible and minimise waste generation which shall be re-used, recycled or disposed of by the best environmental option.

We shall encourage all employees to accept environmental responsibility through appropriate training. Everyone at Penso shall be encouraged to conserve resources through the efficient use of electricity, gas, fuel and water.

We shall consider all associated environmental issues when replacing equipment and fittings and when making any changes to the existing manufacturing operations.

We shall make our environmental policy known and encourage similar standards from suppliers and third parties involved with our company.

The Directors & Managers are committed to this environmental policy and shall endeavour to provide all necessary resources to achieve its objectives and targets, this policy shall be made available to the public upon request.
