PENSO; a product development consultancy that thinks differently.

Penso has established itself as an innovative engineering company for Engineering Services, Consulting Services and Niche Vehicle Manufacturing. We operate in automotive, aerospace, defence and renewable energy industries.

The application of fresh thinking allows us to provide a high quality cost effective service to our customers, who appreciate the difference...

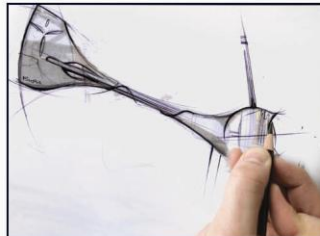

## Company Overview

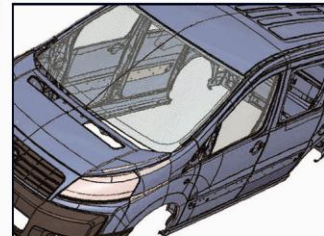

Penso is a multi-industry specialist engineering company based in UK. While being a relatively young firm we are already seen as credible and reliable business partner for global OEMs.

Our experts are trained in providing high quality, added-value services. These services include product design and development, complete electronic and electrical vehicle systems engineering, low volume manufacture of roof systems, trim development and niche vehicle development.

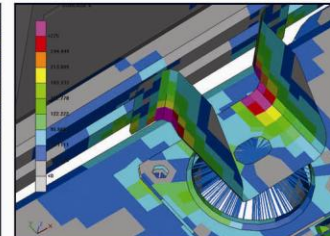

## OUR EXPERTISE

CONCEPT  
DESIGN

CAD  
ENGINEERING

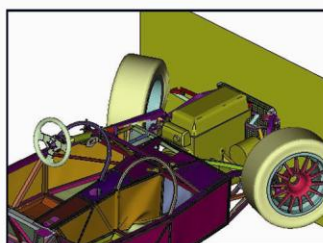

CAE  
ANALYSIS

We developed our presence as a high-tech engineering service provider for international brands such as;

- > Mercedes-Benz
- > Jaguar Land Rover
- > Prodrive
- > Spyker
- > Fiat
- > Foster + Partners
- > G.E.
- > G.K.N.
- > BAE Systems.

At Penso we support a variety of industries with our Product Development services. We manage all aspects of the design cycle, from blue-sky concepts sketches, A Class Surfacing, Fatigue and Durability Analysis, to full vehicle engineering, Project Management and full vehicle type approval.

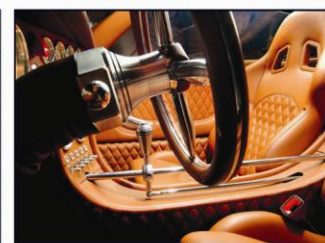

With a growing reputation for delivering world class engineering services, we pride ourselves in offering our clients with honest, imaginative, innovative decision-making, ensuring your expectations are not only met, but exceeded.
